Professional Summary

I'm an Information Technology graduate interested in using data to understand problems and support better decisions. Built analytics dashboards with Power BI and SQL to explore trends, performance, and business metrics. Seeking an entry-level Data Analyst role to apply my skills and continue learning.

Education

Kalasalingam Academy of Research and Education, Krishnankoil	CGPA
Bachelor of Technology-IT (2023-2026)	8.29
Arulmigu Kalasalingam Polytechnic College, Krishnankoil	Percentage
Diploma in Computer Engineering (2019-2022)	93.41

Skills

Languages: Python, SQL

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Tools & Platforms: Power BI, Microsoft Excel, Git, GitHub, VS Code

Projects

Online Shopping Return Behaviour & Return Risk Analytics

- Created a dashboard to understand online shopping patterns, customer and order activity, and product returns.
- Summarized return-related trends and key indicators to support clearer business analysis.

Food Delivery Operations & Performance Analytics

- Built a multi-page Power BI dashboard to explore order trends, delivery performance, restaurant revenue, cancellations, and customer ratings.
- Used key metrics and charts to make operational patterns easier to understand and highlight areas for improvement.

Tourism Demand Forecasting

- Designed a tourism-based recommendation system focused on locations within Tamil Nadu.
- Provides alternative hidden tourist spots and comparisons to reduce overcrowding in popular destinations.

Certifications

- **Internship In data science at Ether services, Coimbatore (2024):** Completed a one-month internship focusing on data analysis, visualization, and basic machine learning applications.
- **IEEE Paper Publication – ITIKD 2025:** Published research on an End-to-End Secure Cryptographic System, focusing on secure communication frameworks and cryptographic algorithms.
